## Number - number and place value

- Count from 0 in multiples of 4, 8, 50 and 100
- Read and write numbers up to 1000 in numerals and in words
- Identify, represent and estimate numbers using different representations
- Recognise the place value of each digit in a threedigit number (hundreds, tens, ones)
- Compare and order numbers up to 1000
- Find 1, 10 or 100 more or less than a given number
- Read Roman numerals from I to XII
- Solve number problems and practical problems involving these ideas

## Number - fractions

- Count up and down in tenths
- Recognise that tenths arise from dividing objects into 10 equal parts and in dividing one-digit numbers or quantities by 10
- Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators
- Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators
- Recognise and show, using diagrams, equivalent fractions with small denominators
- Add and subtract fractions with the same denominator within one whole [for example, $\frac{5}{7}+\frac{1}{7}=$ $\frac{6}{7}$ ]
- Compare and order unit fractions, and fractions with the same denominators
- Solve problems that involve all of the above

## Number - addition and subtraction

- Add and subtract numbers mentally, including: - a three-digit number and ones
- a three-digit number and tens
- a three-digit number and hundreds
- Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction
- Estimate the answer to a calculation and use inverse operations to check answers
- Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction

## Geometry - properties of shapes

- Draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them
- Recognise angles as a property of shape or a description of a turn
- Identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle
- Identify horizontal and vertical lines and pairs of perpendicular and parallel lines

## Statistics

- Interpret and present data using bar charts, pictograms and tables
- Solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables

## Number - multiplication and division

- Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables
- Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods
- Solve problems, including missing number problems, involving multiplication and division including positive integer scaling problems and correspondence problems in which $n$ objects are connected to m objects

## Measures

- Measure, compare, add and subtract: lengths (m/cm/mm); mass (k g/g); volume/capacity (l/ml)
- Measure the perimeter of simple 2-D shapes
- Tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24 -hour clocks
- Estimate/read time with increasing accuracy to the nearest minute
- Record/compare time in terms of seconds, minutes, hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon, midnight
- Know the number of seconds in a minute and the number of days in each month, year and leap year
- Compare durations of events [for example to calculate the time taken by particular events or tasks]
- Add and subtract amounts of money to give change, using both $£$ and $p$ in practical contexts
